📄 SUMMARY

Results-driven Java Developer with 1 year of experience in designing and implementing robust back-end solutions using Java, Spring Boot, and Microservices. Expertise in building and optimizing RESTful APIs, Hibernate, and database management. Strong problem-solving skills with a focus on delivering scalable, high-performance applications in Agile environments.

👛 PROFESSIONAL EXPERIENCE

Mphasis, Trainee Associate Software Engineer
01/2022 – 01/2023 | Pune, India

- Developed secure, modular, and efficient code utilising Java, Spring Boot, and Microservices to ensure scalability and high performance for a peer-to-peer payment project.
- Worked closely with clients to gather requirements, address issues, and exceed expectations during product upgrades.
- Contributed to the development of new features and product upgrades, improving functionality and user experience.
- Front-end features were integrated using Angular, HTML, CSS, and JavaScript to improve user experience and provide responsive design across platforms.

🎓 EDUCATION

BE, Computer Science & Engineering, Shri Vithal Education & Research Institute College Of Engineering
2016 – 2020 | Pandharpur, India
CGPA | 7.5/10

📜 PROFESSIONAL CERTIFICATE

Java Full Stack Developer
Simplilearn (2022).

🧠 SKILLS

Languages & Frameworks

Java (Java 8), J2EE, Spring, Spring Boot, Hibernate, JDBC, Servlet, JSP, Microservices

Web Technologies

HTML5, CSS, JavaScript, JSON, Angular 10

Tools & Platforms

Apache Tomcat, Apache Maven, Postman, Docker, Jenkins

Databases

MySQL, Oracle

Cloud & DevOps

AWS (EC2, S3, RDS), Git, GitLab.

Methodologies

Scrum, Agile

Operating Systems

Windows, Unix, Linux, CentOS 8

📁 PROJECTS

Advanced Driving School Management System

- Designed and developed the back-end system using Java, Spring Boot, and Hibernate, ensuring a secure and scalable architecture.
- Developed front-end components using Angular, HTML, CSS, and Bootstrap, ensuring a user-friendly and responsive interface.
- Implemented RESTful APIs to enable seamless integration between front-end and back-end systems, improving data flow and system efficiency.

Movie Plan Application

- Developed Java-based Movie Plan application using Spring Boot, REST API, Microservices, Hibernate, JDBC, HTML, CSS, Bootstrap, JavaScript, Angular, SQL.
- Enabled seamless movie discovery, showtime scheduling, seat reservation, and ticketing.
